

CHAPTER – 01

INTRODUCTION

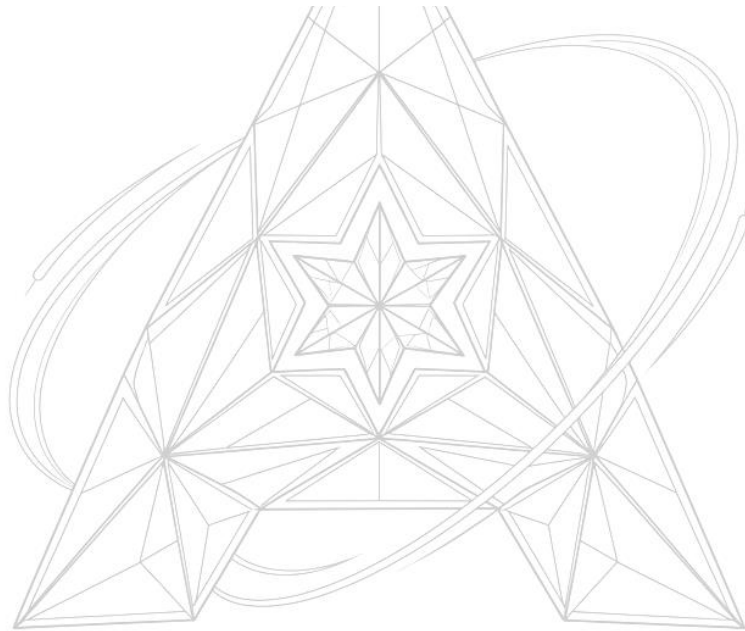

1.1 – Project Overview

This project is about looking at housing market data to see what is happening with property sale prices and how things like the number of rooms and the size of the house affect what people are willing to pay. The project uses Tableau to make interactive dashboards and pictures that help people who care about this stuff look at prices. What makes a house valuable in a way that is easy to understand. The housing market data is used to identify trends, in property sale prices and understand how different housing features influence the market value of the housing market.

- Tableau is used for data visualization. Creating dashboards. Tableau is really good at helping us see the data in a way. We use Tableau for data visualization. To make dashboards.
- Excel or CSV Dataset is where we get our data from. We do some work on it to make it ready .We use Excel or CSV Dataset as the source of our data. We do some preprocessing on the data.
- Data Analytics Techniques are used to find trends and to filter and compare things. Data Analytics Techniques help us do trend analysis and we can filter and compare data, with Data Analytics Techniques.
- The dashboard shows us the sale price distribution and how it is trending over time. We can compare prices of properties that have feature .It also shows us a map of the area with housing prices
- We have filters that we can use to find properties of a type in a certain location or within a certain price range. The dashboard gives us a look at important numbers, like the average sale price of properties and the total number of sales.

Visualizing Housing Market Trends: An Analysis of Housing Sale Prices and Property Features Using Tableau

- We get an understanding of what is happening in the housing market .The Housing Market and its behavior is something we understand really now .We find out what features of a property make its sale price go up or down.
- The Housing Market is easier to understand with visualizations that help us make decisions quickly about the Housing Market.
- The internship gives me experience in taking data and turning it into visual insights that make sense, for internship projects that only last a short time.
