CHAPTER – III

REQUIREMENT ANALYSIS

3.1 – Customer Journey Map

A Customer Journey Map shows the steps a customer takes when interacting with a product, service or organization. It helps businesses understand what customers experience, need, feel and struggle with throughout their journey. Key Components of a Customer Journey Map This defines who the target customer is, including their age income, goals, behaviors and likes. These are the phases a customer goes through. They include: At each stage customers do things. For example they might search for information compare options make purchases or seek help. These are the points where customers interact with the organization. They include: Customer Journey Map helps businesses improve Customer Journey Map is very helpful, for businesses The Customer Journey Map is used by businesses When customers go through each stage they have feelings like excitement or confusion. Sometimes they feel satisfied and other times they feel frustrated. Customer emotions are feelings that customers experience during each stage of their journey, such as excitement, confusion, satisfaction or frustration Customers have problems when they are trying to do something. These problems are like obstacles that get in their way. Customer pain points are challenges or obstacles that customers encounter during their journey.
