

Visualizing Housing Market Trends: An Analysis of Housing Sale Prices and Property Features Using Tableau

TEAM ID	SWTID -2026-5976
PROJECT TITLE	Visualizing housing market trends: an analysis of sale prices and features using tableau
MAX MARKS	5 MARKS

CHAPTER – IV PROJECT DESIGN

4.1 – Problem Solution Fit

Tableau turns raw housing data into pictures and dashboards. It's easier to understand how the market behaves and what properties are like. Buyers and investors don't have clear information on what affects property prices. They make investment choices and value properties wrongly. Visual analysis of property details, like area, bedrooms, bathrooms, location and sale price. They make informed buying and investment choices. Real estate professionals struggle to compare property values in different areas. They do market analysis and pricing strategies inefficiently Maps and charts show how prices vary in regions markets and plan strategies better.

Finding housing market trends over time takes a lot of time They respond to market changes. Time-series pictures track how prices change and sales trends They spot market opportunities and risks faster. Data-driven decisions are limited by reports that don't change. It reduces business efficiency and forecasting accuracy. Interactive dashboards let users filter, explore and drill down into data They make decisions and get deeper insights

The new solution that uses Tableau is really good at helping people understand housing market data. It takes information and turns it into interactive and easy to use dashboards. This means that people like buyers and investors can see things like how much houses cost what features they have and how different areas are doing. They can also see what is happening in
