

Visualizing Housing Market Trends: An Analysis of Housing Sale Prices and Property Features Using Tableau

TEAM ID	SWTID –2026- 5976
PROJECT TITLE	Visualizing housing market trends: an analysis of sale prices and features using tableau
MAX MARKS	5 MARKS

CHAPTER – VII

FUNCTIONAL AND PERFORMANCE TESTING

7.1 – Performance Testing & Functional Testing

Testing is an important part of the project "Visualizing Housing Market Trends: An Analysis of Housing Sale Prices and Property Features Using Tableau." This is where we make sure the dashboard works properly gives us the information and runs smoothly when people use it in different ways. The testing process has two parts: Functional Testing and Performance Testing. These two parts help us make sure the Tableau dashboard is quality, reliable and easy to use.

Functional Testing checks that all the features of the dashboard work the way they are supposed to. It makes sure the data is correct users can interact with it easily and the calculations, filters and visualizations are all working right. We test every part of the dashboard to make sure users can look at housing market trends and property features without running into problems.

When we test we check a lot of things. We make sure the data connections are working the calculated fields are correct the important metrics are right and the filters and parameters are working as they should. We also check that the options and the interactive parts to make sure they are all working properly.

* Verify that we can connect to the housing datasets successfully.

Visualizing Housing Market Trends: An Analysis of Housing Sale Prices and Property Features Using Tableau

- * Validate that the data import and refresh processes are working.
- * Check that the sale price calculations and important metrics are correct.
- * Test the filters, such, as location, property type and date range.
- * Verify that the charts are interactive and the drill-down features are working.
- * Ensure that the maps are showing the geographical information.
- * Confirm that the dashboard is easy to navigate and works well.
- * Validate that the tooltip information and data labels are correct.
