Sheet 01 – Area Chart

1. From the Data pane, drag Order Date to the Columns Shelf.

2. Right-click YEAR (Order Date) on the Columns shelf.

3. Select Month.

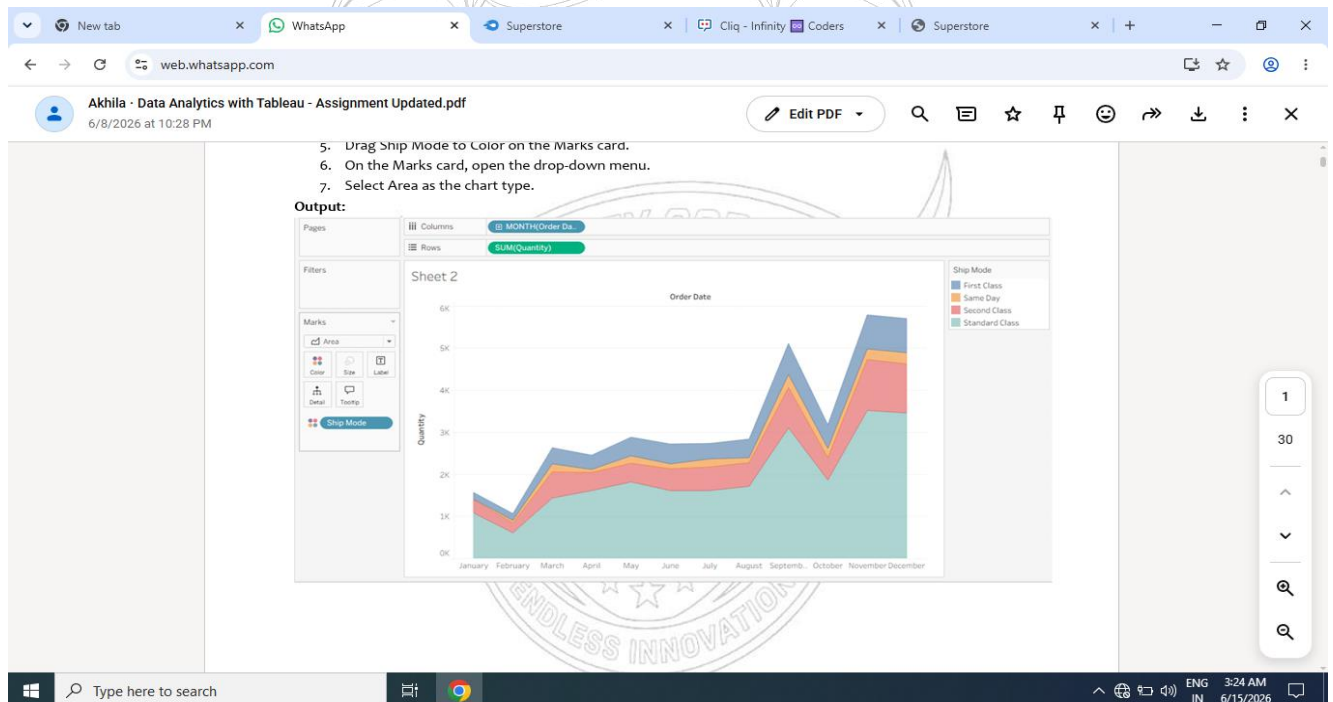

4. Drag Quantity to the Rows Shelf.

5. Drag Ship Mode to Color on the Marks card.

6. On the Marks card, open the drop-down menu.

7. Select Area as the chart type.

Output:

Sheet 02 – Bar Chart

1. Drag Sales to the Rows Shelf.

- ☐ **Tableau automatically aggregates Sales as SUM(Sales).**
- ☐ **Since Order Date is used, Tableau first shows a Line Chart representing yearly sales trends.**

2. On the Marks Card, click the drop-down menu.

3. Select Bar. Add Ship Mode Colors

4. Drag Ship Mode to Color on the Marks card. Add Region Comparison

5. Drag Region to the Rows Shelf (left of Sales). Filter Only West Region

6. Drag Region again to the Filters Shelf.

7. In Filter dialog box:

- ☐ **Uncheck Central** ☐ **Uncheck East** ☐ **Uncheck South**
- ☐ **Keep only West**

8. Click OK

Output:

8. Click OK

Output:

➤ **Sheet 04 - Gantt Chart**

- **Add Order Date to Columns , Drag Order Date from Dimensions.**
- **Drop it on the Columns Shelf.**
- **Tableau automatically shows YEAR(Order Date).**
- **Click drop-down arrow on YEAR(Order Date) in Columns shelf.**
- **Select: More → Week Number Now columns display weekly timeline**
- **Drag Sub-Category to Rows Shelf.**
- **Drag Ship Mode to Rows Shelf and place it right side of Sub-Category.**
- **Now rows show: ☐ Furniture → First Class / Standard Class etc. ☐ Office Supplies → etc.**
- **In Marks card click dropdown.**
 - **Select Gantt Bar Now bars appear across timeline.**
- **Click Analysis → Create Calculated Field**
- **Name: OrderUntilShip**
- **Formula: DATEDIFF('day',[Order Date],[Ship Date]) Click OK**
- **Drag OrderUntilShip to Size on Marks card. Bars become longer based on shipping days.**
- **Right-click SUM(OrderUntilShip) on Marks card.**
- **Select: Measure → Average Now average shipping delay is shown.**
- **Drag Ship Mode to Color in Marks card. Now each ship mode gets different color.**

Sheet – 05 - Heat Map

1. Drag Segment from Dimensions.

2. Drop it on Columns Shelf.

✓ **You will see:** ☐ Consumer ☐ Corporate ☐ Home Office **.Drag Region to Rows Shelf**

✓ **Drag Sub-Category to Rows shelf and place it to the right of Region.**

✓ **Now hierarchy becomes:** ☐ Central → Chairs, Tables, Phones etc. ☐ East ☐ South ☐ West

1. Drag Profit measure.

2. Drop it on Color in Marks card.

3. Now Tableau colors cells based on profit. ☐ High Profit = Blue / Dark ☐ Loss = Orange

4. 1. Click Color on Marks card.

5. 2. Under Border, choose Medium Gray This makes each box clearer.

6. 1. On Profit color legend click dropdown arrow.

7. 2. Select Edit Colors In dialog box:

- **Palette = Red-Black Diverging**

- **Check Use Full Color Range**

- **Click Apply**

- **Click OK Now:**

- **Profit = Black / Dark**

- **Loss = Red**

8. Step 6: Add Sales to Size

1. Drag Sales measure.

Drop it on Size in Marks card.

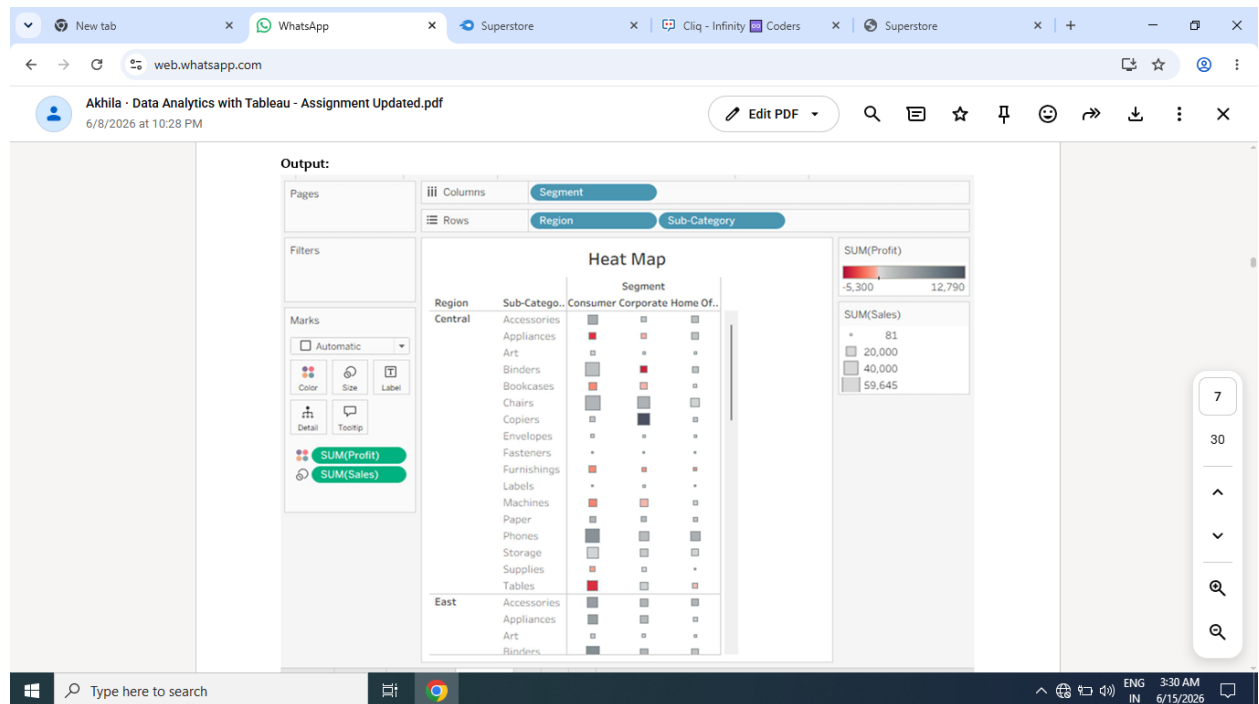

9. Now box size represents Sales amount.

☐ **Large box = High Sales**

- ❑ **Small box = Low Sales**
- 2. Click Size on Marks card.**

12. Move slider to right until boxes fit properly.

Output:

ALPHA
- INNOVATORS -

Sheet – 06 - Histogram:

1.From Measures, drag Quantity

- **Drop it on Columns Shelf**

2.Click Show Me (top right corner)

3.Select Histogram Tableau Automatically Does:

4.Creates Quantity (bin) on Columns

5.Moves Quantity to Rows

6.Changes aggregation to CNT(Quantity)

7.X-Axis: Quantity Bins

8.Y-Axis: Count of Orders

9.Example: Around 4800 orders had quantity = 2

Around 2400 orders had quantity = 4

- **Drag Segment from Dimensions**

- **Drop it on Color in Marks card Now bars become stacked by:**

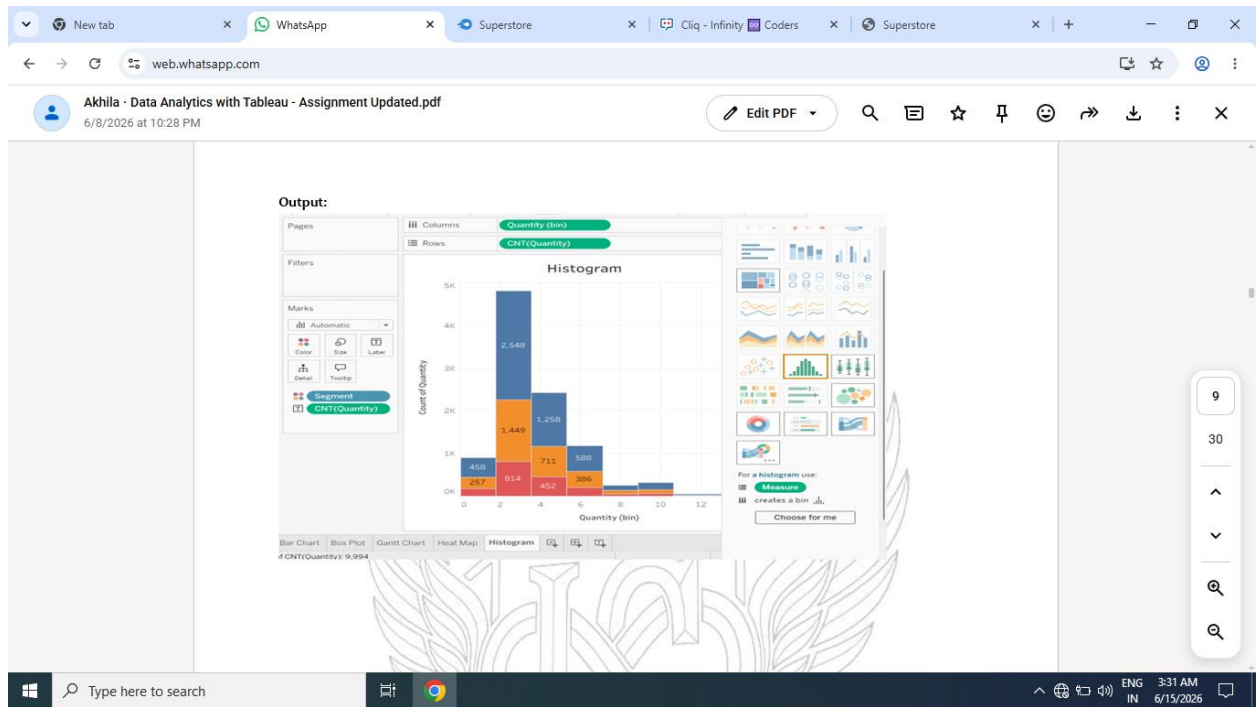

10. Consumer , Corporate , Home Office

- **Hold Ctrl**
- **Drag CNT(Quantity) from Rows shelf to Label on Marks card (Using Ctrl copies field.)**

11. . Right-click CNT(Quantity) on Marks card

12. Select: Quick Table Calculation → Percent of Total Now labels show percentages.

13. Output:

ALPHA
- INNOVATORS -

Sheet 08 - Packed Bubble Chart

- **Drag Category from Dimensions**
- **Drop it on Columns Shelf**

+ You will see: **Furniture , Office Supplies , Technology.**

+ **Drag Sales measure**

+ **Drop it on Rows Shelf** Tableau creates a **Bar Chart** by default.

+ **Click Show Me (top right)**

+ **Select Packed Bubbles** Now Tableau creates bubbles for: **Furniture , Office Supplies , Technology**

+ **Bubble size = Sales**

+ **Drag Region**

+ **Drop it on Detail in Marks card** Now each **Category splits into:**

+ **East**

+ **West**

+ **Central**

+ **South**

+ **More bubbles appear.**

+ **Drag Profit**

+ **Drop it on Color** Now bubble color represents **Profit.**

+ **Example:**

+ **Dark Blue = High Profit**

+ **Light Blue = Lower Profit**

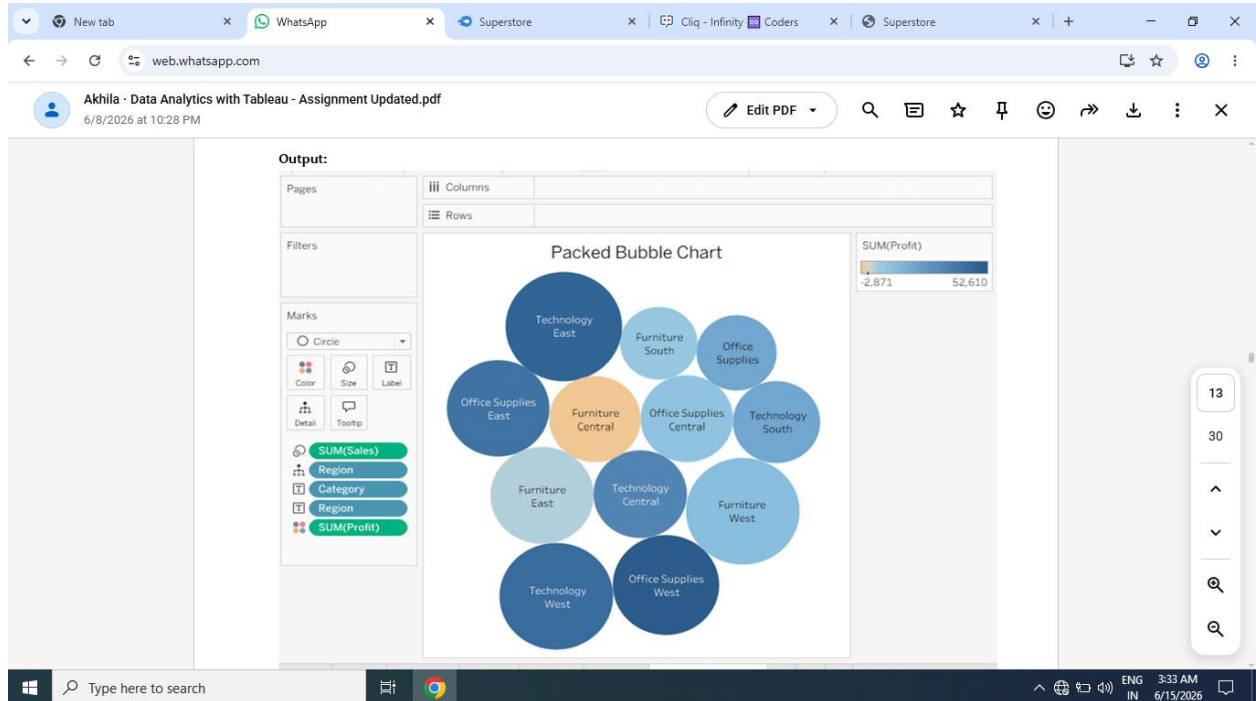

+ **Orange/Red (if palette changed) = Loss**

+ **Drag Region**

 **Drop it on Label**

 **Now each bubble displays region name.**

 **Output:**

ALPHA
- INNOVATORS -

Sheet – 07 - Line Chart:

a) Drag Ship Date from Dimensions.

b) Drop it on Columns Shelf.

2) Tableau shows: YEAR(Ship Date

a) Drag Sales measure.

b) Drop it on Rows Shelf Tableau creates a line chart.

1. Drag Profit measure.

c) Drop it on Rows shelf, right side of Sales.

3) Now Tableau creates two separate axes:

4) Sales Axis

5) Profit Axis

a) Drag SUM(Profit) from Rows shelf.

b) Drop it directly on the Sales Axis. (You will see two pale green lines.) Release mouse.

6) Now Sales and Profit share same axis.

a) Click dropdown on YEAR(Ship Date) in Columns shelf.

b) Select: Month (from lower continuous section) Now chart becomes monthly trend line across years

7) ✓ Higher values near year-end

8) ✓ Repeating yearly spikes

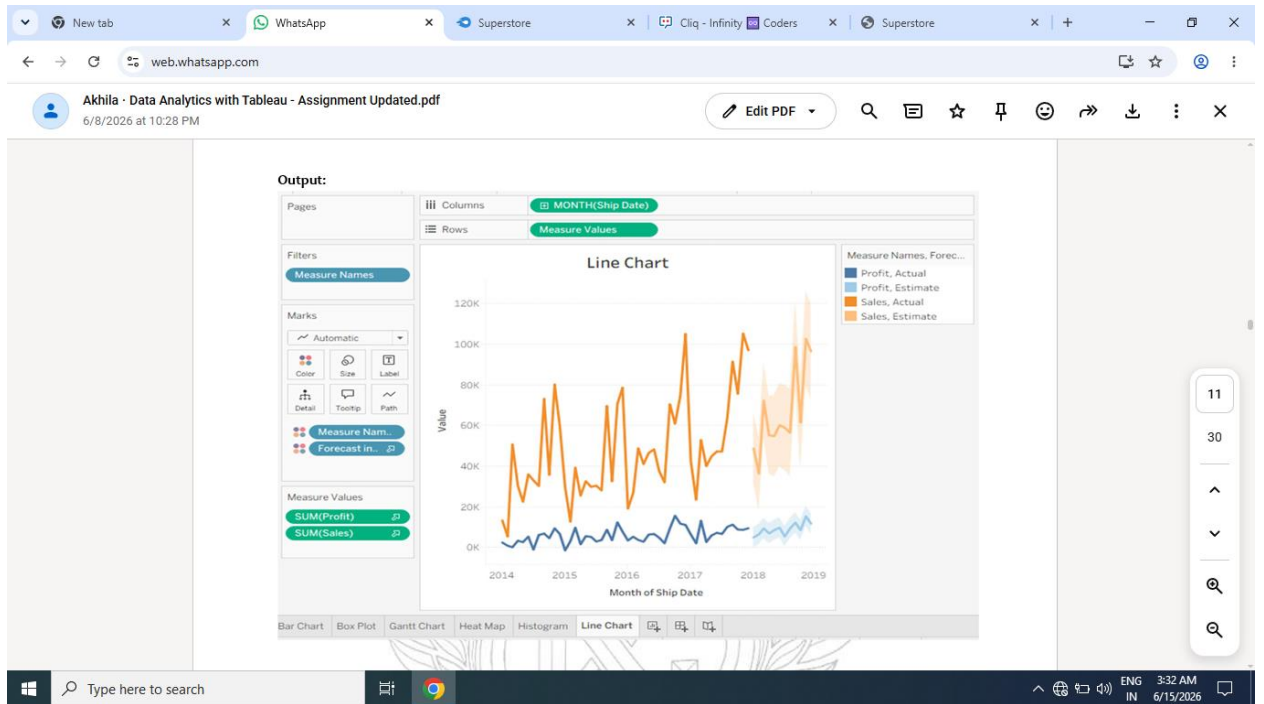

9) ✓ Seasonal business growth This is called Seasonality.

1. Click Analytics Pane

a) Drag Forecast

b) Drop into chart area Tableau automatically predicts future trend.

Output:

— INNOVATORS —

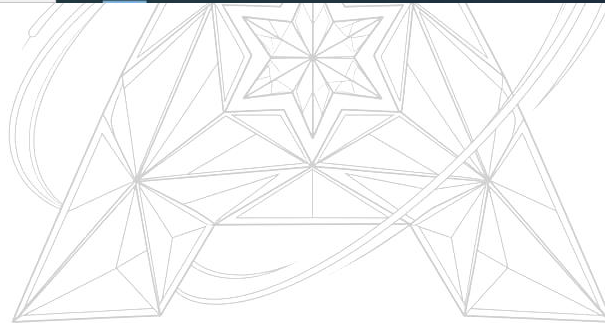

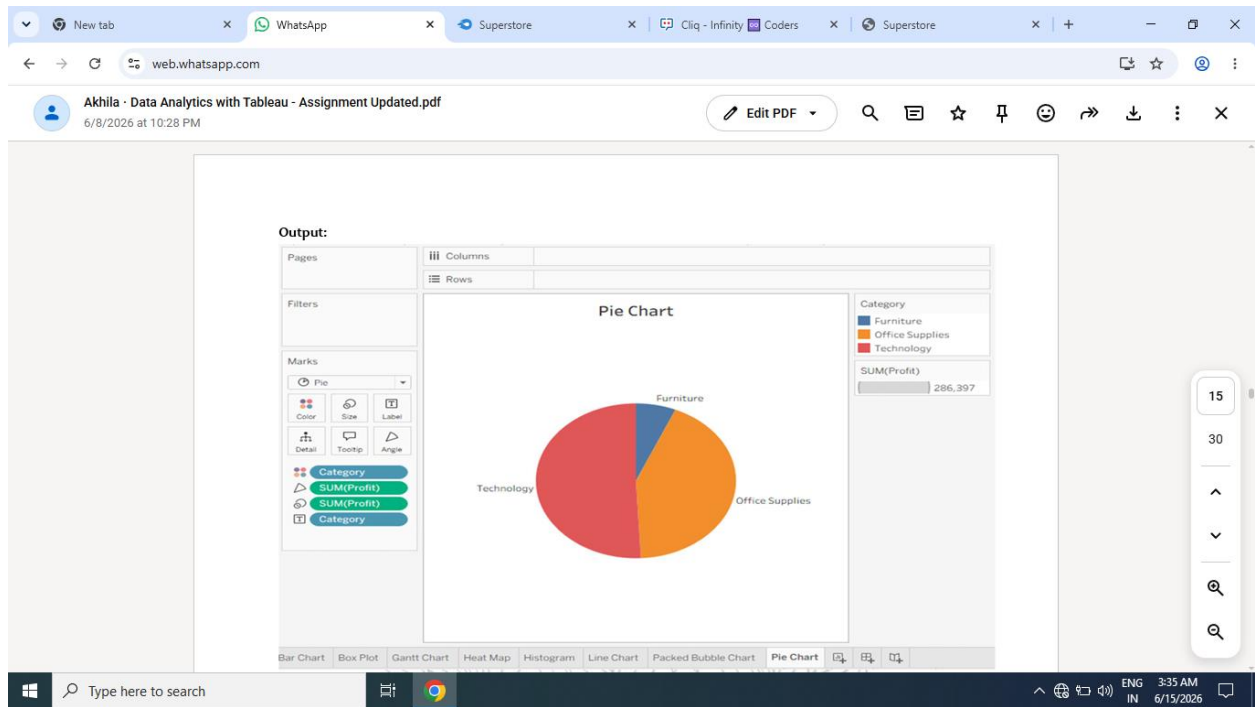

Sheet 09 - Pie Chart

- 1. Drag Profit measure**
- 2. Drop it on Columns Shelf**
- 3. Drag Category dimension**
- 4. Drop it on Rows Shelf** Tableau creates a Bar Chart by default.
- 5. Click Show Me (top-right)**
- 6. Select Pie Chart** What Tableau Automatically Does After selecting Pie Chart:
 - ✓ **Mark Type changes to Pie**
 - ✓ **SUM(Profit) moves to:** ☐ **Angle** ☐ **Size**
 - ✓ **Category moves to:** ☐ **Color**
- 7. Click Size on Marks card**
- 8. Move slider right** Now pie chart becomes larger.
- 9. Drag Category**
- 10. Drop it on Label in Marks card** Now chart displays:

☐ Furniture ☐ Office Supplies ☐ Technology

Output:

ALPHA
— INNOVATORS —

Sheet 10 - Scatter Plot:

1. Drag Sales measure

2. Drop it on Columns Shelf Tableau creates horizontal axis.

3. Drag Profit measure

4. Drop it on Rows Shelf Tableau creates vertical axis. Now you get one mark scatter plot.

5. Drag Category dimension

6. Drop it on Color in Marks card Now marks split into:

☐ Furniture ☐ Office Supplies ☐ Technology

7. Each category gets different color.

8. Drag Region , Drop it on Detail in Marks card Now more marks appear. Because each Category is divided by:

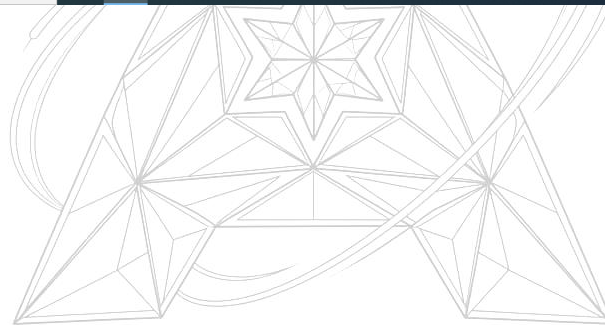

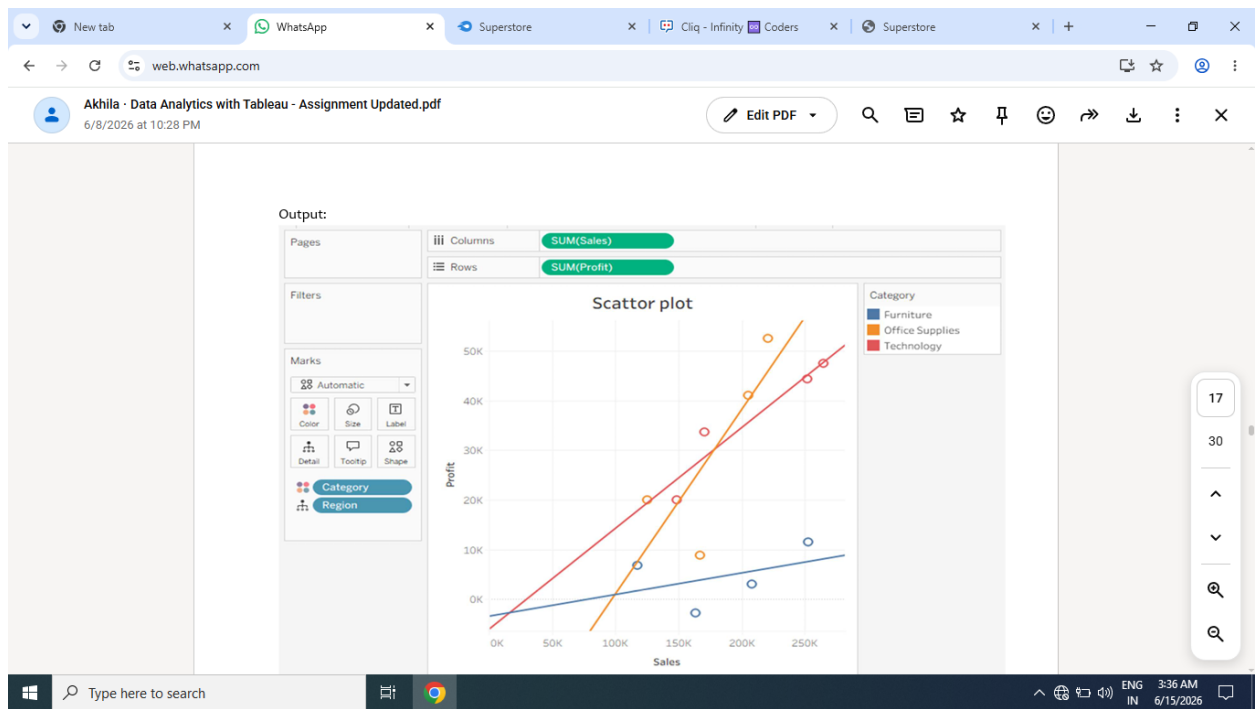

☐ Central ☐ East ☐ South ☐ West **Total marks = Category × Region**

9. Click Analytics Pane

10. Drag Trend Line

11. Drop it on chart Select: Linear

Output:

ALPHA
— INNOVATORS —

Sheet – 11: Text Table with Percentages,

**1. Drag Order Date dimension ,Drop it on Columns Shelf
Tableau displays: YEAR(Order Date).**

**2. Drag Sub-Category , Drop it on Rows Shelf Now a
table structure is created.**

Rows = Sub-Categories

Columns = Years.

**3. Drag Sales , Drop it on Text in Marks card Now each
cell shows: SUM(Sales) for each year and sub-category.**

**4. Drag Region , Drop it to the left side of Sub-Category
in Rows shelf**

**5. Right-click SUM(Sales) on Marks card , Select: Add
Table Calculation**

6. In Dialog Box:

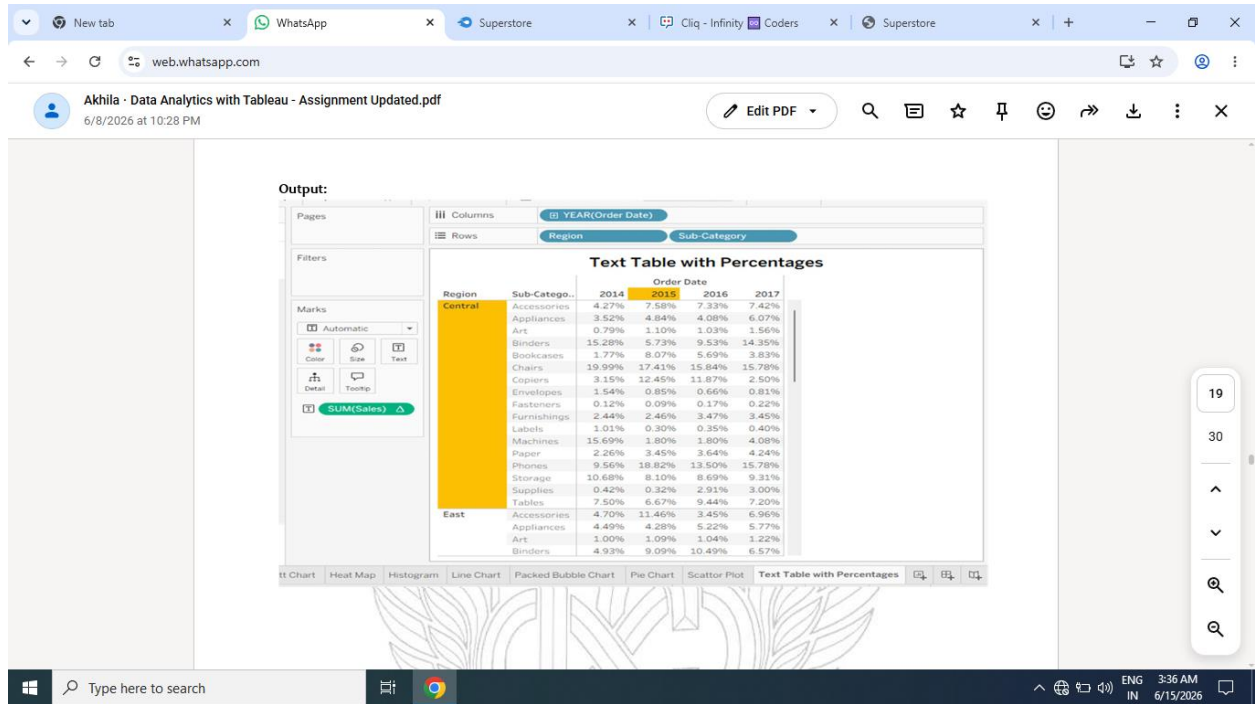

Calculation Type:

Percent of Total Compute Using:

Pane (Down)

Then click OK.

Output:

ALPHA
— INNOVATORS —

Sheet - 12 Tree map

Step 1: Add Sub-Category to Columns

- 1. Drag Sub-Category dimension**
- 2. Drop it on Columns Shelf You will see category names on horizontal axis.**

Step 2: Add Sales to Rows

- 1. Drag Sales measure**
- 2. Drop it on Rows Shelf Tableau creates a Bar Chart by default.**

Step 3: Change to Treemap

- 1. Click Show Me (top-right)**
- 2. Select Treemap Now Tableau creates rectangles for each Sub-Category.**

Default Treemap-Meaning

Step 4: Add Ship Mode to Color

- 1. Drag Ship Mode**
- 2. Drop it on Color in Marks card**

Now rectangles are colored by:

☐ **First Class**

☐ **Second Class**

☐ **Standard Class**

☐ **Same Day Sales still controls size.**

Step 5: Alternative View (Profit Color) If you want profit analysis:

1. Click Undo to remove Ship Mode

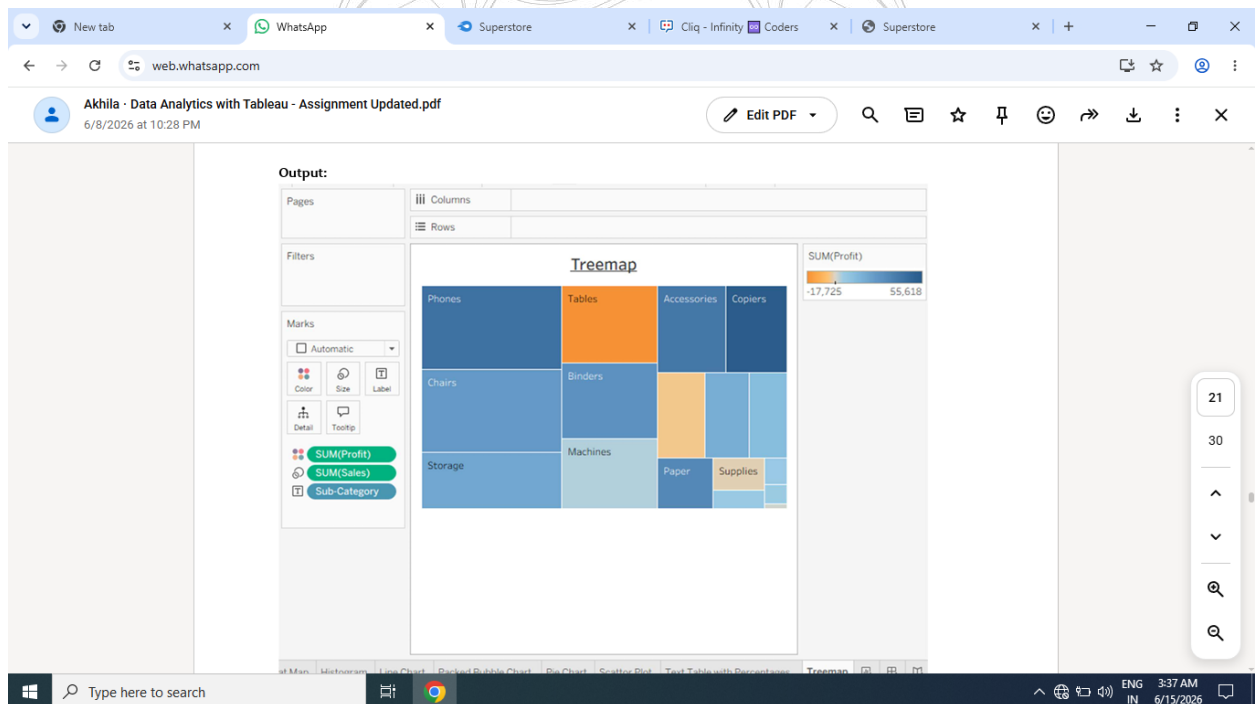

2. Drag Profit

3. Drop it on Color Now:

☐ **Size = Sales**

☐ **Color = Profit**

Output:

Sheet – 13 - Donut Chart

Step 1: Create a Calculated Field

- 1. Go to the Analysis menu.**
- 2. Select Create Calculated Field.**
- 3. Name the field as Zero.**
- 4. In the formula area, type: 0**
- 5. Click OK.**

Step 2: Drag Zero to Rows

- 1. From the Measures section, drag Zero to the Rows shelf.**

Step 3: Convert into Pie Chart

- 1. In the Marks card, click Automatic.**
- 2. Select Pie.**
- 3. From the toolbar, choose Fit → Entire View.**

Step 4: Increase Pie Size

- 1. In the Marks card, click Size.**
- 2. Increase the size slider. This creates a larger pie chart.**

Step 5: Create Second Pie for Donut Hole

- 1. Again drag Zero from Measures to the Rows shelf.**
- 2. Place it on the right side of the first SUM(Zero). Now two pie charts appear.**

Step 6: Create Dual Axis

- 1. Right-click on the second SUM(Zero) in Rows.**
- 2. Select Dual Axis. Now both pie charts overlap.**

Step 7: Create the Inner Circle

- 1. In the Marks card, click the second SUM(Zero).**
- 2. Click Size and reduce the size slightly.**
- 3. Click Color.**
- 4. Select White color. This creates the donut hole effect.**

Step 8: Add Region Colors

- 1. Click the first SUM(Zero) Marks card.**
- 2. Drag Region to Color. Now each region gets different colors.**

Step 9: Add Labels

- 1. Drag Region to Label on the Marks card.**
- 2. Drag Sales to Label.**
- 3. Drag Sales to Angle. The pie slices now display sales values and adjust according to sales.**

Step 10: Add Total Sales in Center

1. Click the second SUM(Zero) Marks card.

2. Drag Sales to Label.

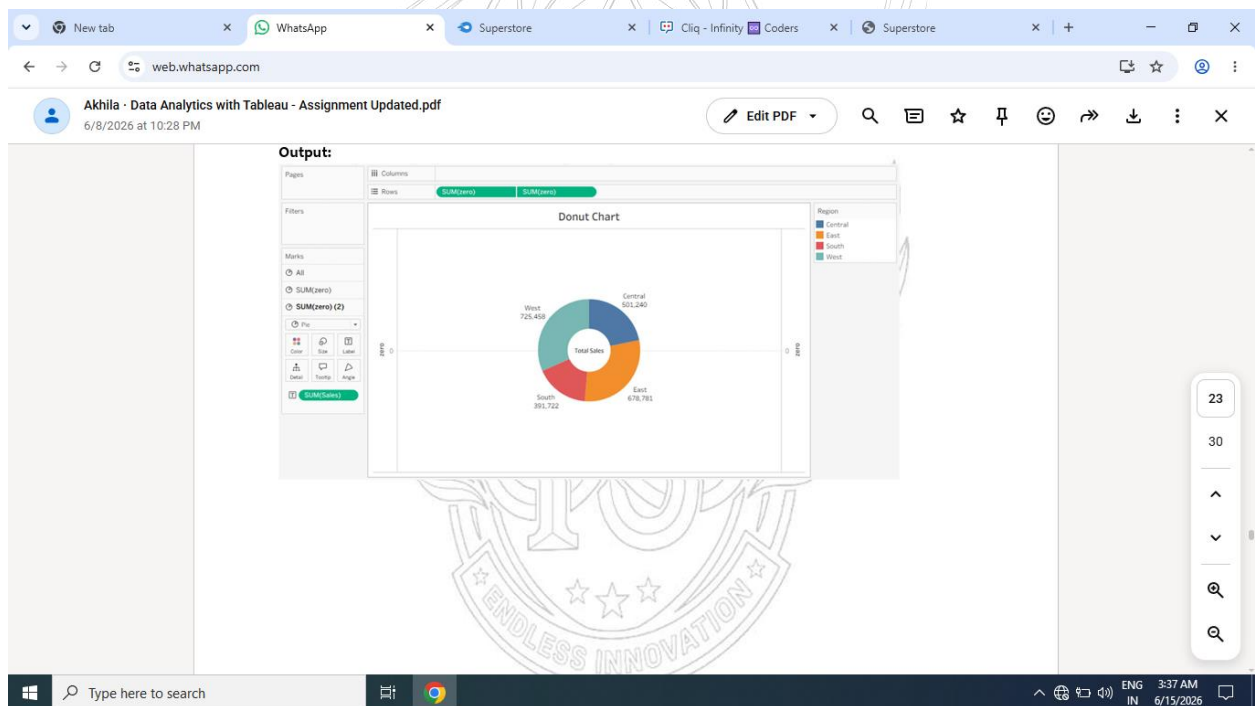

3. Click Label → Text.

4. Click the three dots (...) beside text editing. Type: Total Sales 5.

Click OK.

Now the center of the donut chart displays Total Sales.

Output:

Sheet – 14 - Map Chart

Step 1: Create a Basic Map

- 1. From the Data Pane, drag State to the workspace.**
- 2. Tableau automatically generates a map using Latitude and Longitude**

Step 2: Add Sales Information

- 1. Drag Sales from Measures to Color in the Marks card.**
- 2. The map now displays sales values with different colors.**

Step 3: Change Map Type

- 1. In the Marks card, click Automatic.**
- 2. Select Map or Filled Map.**
- 3. Map → Shows circles on locations.**
- 4. Filled Map → Fills states with colors.**

Step 4: Adjust Colors

- 1. Click Color on the Marks card.**
- 2. Select Edit Colors.**
- 3. Choose a color palette (Purple).**
- 4. Click OK.**

Step 5: Add Labels

- 1. Drag State to Label.**

2. Drag Sales to Label.

Now each state shows its sales value.

Step 6: Add Region Filter

1. Drag Region to the Filters shelf.

2. Select All regions.

3. Click OK. This allows regional analysis on the map.

Step 7: Add Profit Details

1. Drag Profit to Tooltip. Hover over any state to view Sales and Profit details.

Step 8: Format the Map

1. Go to Map → Map Layers.

2. Adjust: ☐ Background style (Outdoors) ☐ Washout (70%)

OUTPUT:
